

## ABSTRACT

The present invention aims to provide a method for  
5 producing a resin fine particle by which a resin fine  
particle with high sphericity and even particle diameter  
can easily be obtained, a resin fine particle obtained by  
the method for producing a resin fine particle, a  
polyolefin type resin fine particle, a polyester type resin  
10 fine particle, and an acrylic resin fine particle.

The present invention is a method for producing a  
resin fine particle, which comprises a step 1 of heating  
and/or pressurizing a mixture of a resin and a fluid in  
which the resin is not dissolved in a normal temperature  
15 and normal pressure for making at least one component of  
the fluid supercritical state or subcritical state and a  
step 2 of decreasing the temperature of the fluid for  
releasing the pressure.
